Email: ammarzain8834@gmail.com Phone: +91-7017612909 LinkedIn: linkedin.com/in/asjadiftakhar  
GitHub: github.com/Asjad8834 Portfolio: asjad-portfolio-inky.vercel.app

## Summary

Software Engineer with hands-on experience in Java, Python, and full-stack MERN development. Strong foundation in Data Structures, Algorithms, and Machine Learning, with practical experience building and deploying AI-powered, production-ready applications. Seeking full-stack and software engineering roles focused on scalable, real-world products.

## Education

**Vellore Institute of Technology, Vellore** Graduation: 2026  
B.Tech in Computer Science and Engineering — CGPA: 8.02  
**DPS MIS, Doha, Qatar** Graduated: 2022

## Skills Summary

**Languages:** Java, Python, JavaScript, SQL  
**Frontend:** React.js, HTML, CSS  
**Backend:** Node.js, Express.js, REST API Design  
**Databases:** MongoDB, SQL  
**Machine Learning:** TensorFlow, TensorFlow Lite, CNNs, Model Deployment  
**Tools & Concepts:** Git, GitHub, Postman, CI/CD, CRUD, Agile, Unit Testing  
**Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

## Work Experience

**MERN Stack Developer Intern — Ethnus (Remote)** May 2025 – July 2025

- Developed and maintained full-stack web application modules using MongoDB, Express.js, React.js, and Node.js as part of a remote Agile team.
- Built responsive front-end interfaces and integrated multiple RESTful API endpoints for seamless client-server communication.
- Implemented CRUD functionality, routing, and core application logic, collaborating via Git/GitHub with version-controlled pull requests and code reviews.

## Projects

**Sachi – Assistive Sound Recognition — Patent Published** Aug 2025 – Nov 2025  
*Flutter, TensorFlow Lite, Python, Machine Learning*

- Built an AI-powered mobile application to assist hearing-impaired users by detecting and classifying environmental sounds in real time.
- Trained and deployed a CNN-based audio classification model achieving 87% accuracy, optimized to run under 50ms inference time on mobile devices using TensorFlow Lite.
- Designed a real-time alert system using visual and vibration-based notifications to improve accessibility and usability for hearing-impaired users.

**CRM Software — MERN Stack** Apr 2026  
*React, Node.js, Express.js, MongoDB, Render, Vercel*

- Engineered a full-stack CRM system with modules for contact management, interaction tracking, and lead-stage workflows across multiple pipeline statuses.
- Built and exposed 10+ scalable REST API endpoints to support full CRUD operations across contacts, leads, and activity logs using Node.js and Express.js.
- Designed a normalized MongoDB schema spanning multiple collections and implemented a real-time analytics dashboard visualizing lead conversion and activity trends.
- Deployed a production-ready application on Vercel (frontend) and Render (backend) with secure API integration and environment-based configuration.

## Certifications

Oracle Generative AI Professional Certificate – Oracle • Oracle SQL HeatWave Associate Certification – Oracle  
Microsoft Power BI Data Analytics Certification – Microsoft • Cisco Cybersecurity Certification – Cisco
